Bachelor of Science in Information System

Computer Systems Institute - Legazpi City Albay Philippines
2020/03

Reading Books

I'm truly passionate about diving into the worlds of Business, Finance, Economics, and Biographies through the books I read. There's something incredibly enriching about exploring the intricacies of how businesses operate, the dynamics of financial markets, and the fundamental principles that underpin economic systems.

Moreover, delving into biographies allows me to walk in the shoes of remarkable individuals who have left a significant mark on history. Learning about their journeys, their triumphs, and even their failures, provides invaluable lessons that I can apply to my own life and aspirations.

Rusty James Valladolid

Software Engineer
